

NXTLynk PAD Quick Start Guide

- Charge your device for 4 hours, or until the indication light on the charger turns from red (not charged) to green (fully charged) using the USB cord and the wall charger.
- Create your account and register the device at www.newreality.com/pad/signup.php
- Check your email for a verification email from NewReality, open the email and click on the link for verification. This is what creates the account.
- Once you have logged in, you may purchase sessions on the NewReality website, using either gold coin credits or by using a credit card or PayPal.
- Make sure your device is off, and then turn it on once the USB cable is connected to your computer. A pop-up will appear, with “Open folder” highlighted. You should click on this. The contents of the device will be shown.
- Double-click on the icon labeled PADown, and follow the prompts to login and verify the serial number of your device. You will then be shown two columns: on the left column will be “Available Sessions” and on the right column will be the sessions on your PAD. The sessions which you have just purchased should appear on your “Available Sessions” column on the left. To download them onto your device, click on the session you wish to download from the column on the left and drag it to the column on the right. Once you get a pop up that states “Move Success,” you may exit PADown, turn off the unit, and eject the drive.
- To remove a session, once again open the PADown application. Follow the prompts to login and verify the serial number of your device. Click on the session title in the right side column, and drag it to the “Available Sessions” column. This will remove the session from the PAD.
